# PRODUCTS AND SERVICES FOR THE FEDERAL AVIATION ADMINISTRATION

**C<sup>2</sup> TECHNOLOGIES, INC.** has a longstanding reputation for creating products and services that streamline the Federal Aviation Administration's operations, educate and motivate its personnel, and promote continued advancement of its core mission. C<sup>2</sup>'s demonstrated experience in serving various FAA organizations has resulted in a successful partnership that has received recognition from the AXIEM Awards™, E-Gov, and the American Society for Training and Development (ASTD).

## SAMPLE PROJECTS

### FAA AVS NEXTGEN WBT

The FAA NextGen project involved the graphic and programming development of the FAA's Next Generation (NextGen) Overview Web-based Training Courseware for AVS personnel. This Web-based Training (WBT) includes screen text, graphics, and some narration and animation. Knowledge checks and interactive games are incorporated to assess student learning. The course is Section 508-compliant and SCORM 1.2-conformant.

## OTHER FAA PROJECTS

- Air Traffic Organization (ATO): Leadership Assessment & Development; Safety Culture Behaviors; ATO Career Paths; ATCOTS Procurement; EnRoute WBT; ICAO; Severe Weather Detection; Wind Shear and Microburst Detection; HOST 1.4 Upgrade
- Aviation Systems Standards (AVN): AVN Process Tracking System (APTS); NOTAM Tracking System (NTS); General Maintenance Electronic
- Manual; Introduction to Flight Inspection; Federal Aviation Regulations Part 135/ Part 145/ Differences; e-Business Card
- Aviation Safety (AVS): AIR-520 Training Curriculum Plan; AIR-520 Indoctrination Course Observation; Core Job Function-Skills for Success

# PROVIDING DOCUMENT CONVERSION SOLUTIONS

## MILLIONS OF PAGES CONVERTED EACH MONTH DOCUMENT CONVERSION SOLUTIONS

### DIGITIZATION

Header and reference digitization and tagging services result in fast electronic search and retrieval. We convert diverse document types into XML/SGML formats. Any metadata can be captured, including journal/book title, article/chapter title, author, editor, affiliations, proceedings, volume, issue, page number, ISSN/ISBN, copyright information, abstract, keywords and article/chapter history.

### DATA MINING

Advanced data-mining tools examine source data sets and new data flows from databases, web sites or customer feeds. Our powerful combination of technology and expertise in data mining ensures that new information is classified and transformed into manageable formats that can be easily presented or imported into any database for business intelligence or other purposes.

### DIGITAL ARCHIVES

Convert legacy content assets into non-perishable, flexible digital formats. Our approach combines industry-leading expertise in scanning, imaging, and XML coding to convert, repurpose, and publish information assets and manage your new digital archive in the most cost-efficient manner possible. We create digital end-products from many different sources, including bound or unbound volumes, electronic files, microfilm, and microfiche.

### FORMS PROCESSING

Our proprietary, image-enabled software application provides rapid forms processing. Scanned images of forms can be transmitted in batch mode. The images are then downloaded through a high-speed satellite link. The required fields are captured through keyboarding and verification processes, while built-in validation tools ensure complete data accuracy. We specialize in high-volume processing and can deliver converted data 24/7/365.

### DTD DEVELOPMENT

DTD (Document Type Definition) development services fulfill needs for both print and electronic publishing. From analyzing your project requirements to developing, refining, and documenting the DTD, we create well-structured, efficient, and dynamic end-products. We have rich experience with a variety of DTDs, including simple ISO 12083 or TEI-Lite based DTDs, complex ATA 100 specification aircraft industry-based DTDs and Ovid DTDs.

### SCANNING & IMAGING

End-to-end document scanning and imaging solutions using the latest imaging, scanning, and OCR technology. We have a special expertise in handling rare, high-value text and image content. Our scanning solutions meet print or web requirements, where scanning resolutions range from 72 to 1200 dpi, with output formats such as TIFF, PNG, JPEG2000, SVG, JPEG, GIF, and others. We create metadata per XMP format and embed them into the image for indexing

### RAPID DATA CONVERSION

Every year, we transform millions of text pages and images into digital resources using a unique combination of technology and fast services. Converted content can be tagged, indexed, labeled, searched, published, broadcast, and accessed via multiple digital-end products such as e-Books, .pdfs, digital journals, and web sites and archived for later re-use.

## SERVICES

It is easy to acquire C<sup>2</sup>'s services through GSA's MOBIS contract. The following is a brief description of the MOBIS contracting and the services C<sup>2</sup> offers:

### **SIN 874-1, CONSULTING SERVICES**

C<sup>2</sup> has established itself as a leader in improving human performance through the application of behavioral science and technology. C<sup>2</sup> has completed a variety of successful research and development projects in the areas of strategic planning, business and action planning, performance management (i.e., performance measures and indicators), leadership systems and supervisory training, customized training, process and workforce productivity improvement, organizational and site assessments, program audits and evaluations, distance learning, and instructional systems development in practically every field of endeavor and for all types of personnel.

C<sup>2</sup> has conducted studies and analyses and developed reports, briefings, and summaries of the research findings as well as proposed developmental, consultative, and program implementation efforts.

### **SIN 874-2, FACILITATION SERVICES**

C<sup>2</sup> has facilitated and provided decision support services on a variety of projects utilizing work

groups, self-directed work teams, and focus groups. C<sup>2</sup> has facilitated and convened small and large focus groups as part of front-end analyses, needs assessments, and program evaluations. Our staff uses a variety of technologies, including the use of GroupWare for problem solving, defining and targeting course objectives, and convening and leading large and small group briefings and discussions. Proceedings are recorded on-line and reported back to groups before adjourning.

### **SIN 874-4, TRAINING SERVICES**

C<sup>2</sup> utilizes a variety of off-the-shelf training products that can be readily customized to meet a client's specific needs. These training packages include the following:

- Commercially available off-the-shelf products
- Off-the-shelf products developed by C<sup>2</sup>
- Off-the-shelf products developed by the client

These off-the-shelf products range in topics from customer services, crisis and disaster recovery, team building, leadership and management training, diversity, strategic planning, instructional systems development, distance learning, quality management, business process improvement, problem solving, and change management to software training. Computer-Based Training (CBT) Assessment/Evaluation/Survey Instruments Computer Disks

# OPM/TMA'S BENCHMARK PARTNER OF THE YEAR

## WHAT IS OPM/TMA?

Operated by the United States Office of Personnel Management (OPM), the Training Management and Assistance (TMA) contract vehicle through which Federal organizations acquire training and strategic human capital management services.

## WHAT CAN TMA/C<sup>2</sup> DO FOR ME?

By choosing the OPM /TMA contract option, Government agencies can enjoy its accessibility, efficiency, rapid response, and flexibility while tapping into a wealth of customized C<sup>2</sup> products and services in a fixed-price environment.

## FEATURES

- Available to all Government entities
- Ability to approve contracts in short time frame
- Revolving fund

## FEES

- Scalable depending on size of contract

## TRAINING/E-LEARNING

- Job Task Analysis
- Classroom-based Training
- Technology-based Training Solutions
- Knowledge Management Portals
- Strategic Communications
- Training Implementation
- PMO Support
- Training Evaluation
- Research and Evaluation

[tmap@opm.gov](mailto:tmap@opm.gov)

## OPM/TMA'S VALUE PROPOSITION

One of the greatest benefits of OPM/VMB is the speed and simplicity with which projects can be initiated and completed:

1. Contact TMA with your specific training/HR needs.
2. Develop a Statement of Objectives.
3. Complete an Interagency Agreement.
4. OPM PM, along with representatives of our agency, will select a pool of contractors to participate in a task order competition, and then select and notify vendor.
5. Define project goals at kickoff meeting.
6. Review and approve the contractor's Management Plan with your OPM PM prior to the start of project work.
7. OPM PM will issue task orders and monitor performance in accordance with firm fixed-price orders issued by OPM.

## STRATEGIC HUMAN CAPITAL MANAGEMENT

- Competency Model Development
- Workforce Planning and Development
- Leadership and Knowledge Management
- Organizational Development
- Performance Management Systems Development
- Compensation and Classification
- Career Development
- Program Evaluation
- Strategic Communications & Change Management

# NAVY/USMC CONTRACTS & CAPABILITIES

**C<sup>2</sup> TECHNOLOGIES, INC.** is a full-service provider of e-Learning, multimedia, and video solutions that meet the most demanding requirements of Government, military, and private-sector applications. C<sup>2</sup> brings innovation, integration, deployment, and lifecycle service to its customers.

## C<sup>2</sup> TECHNOLOGIES' NAVY/USMC CONTRACTS AND CAPABILITIES

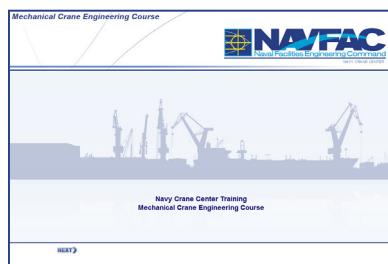

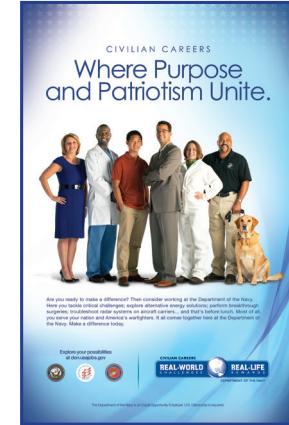

### CONTRACTS

- NAVSEA SeaPort-e
- SPAWAR Command, Control, Communications, Computers, and Intelligence (C4I) Software Engineering Support
- SPAWAR SSC PAC SIGINT/IO Systems Engineering Support
- Office of Personnel Management (OPM)

### PROGRAM/PROJECTS

- Center for Naval Intelligence OPINTEL Analysis Training
- Classroom and eLearning Navy Crane Operations
- NAVAIR NSPS Training
- NAVSEA NSPS Training
- Office of Civilian Human Resources (OCHR) Civilian Branding and Hiring Reform

### CAPABILITIES

- E-Learning
- Interactive Courseware (ICW)
- Online Training Management Systems
- Video Production
- Instructor-Led Training
- Simulator-Based Training
- Virtual Task Trainers

# C<sup>2</sup> TECHNOLOGIES, INC. USCG CONTRACTS & CAPABILITIES

**C<sup>2</sup> TECHNOLOGIES, INC.** is a full-service provider of e-Learning, multimedia, and video solutions that meet the most demanding requirements of Government, military, and private-sector applications. C<sup>2</sup> brings innovation, integration, deployment, and lifecycle service to its customers.

## AWARD WINNING PRODUCTS

- 2013 Davey Silver Award in the Interactive Multimedia – Education (Academic) Category for U.S. Coast Guard Honda BF225 Outboard Engine Virtual Task Trainer
- 2013 Spring Omni Silver Award for Honda BF225 Outboard Virtual Task Trainer in the Government Category
- 2013 Hermes Honorable Mention in the Web Based Multi-Media Category for U.S. Coast Guard Honda BF225 Outboard Engine Virtual Task Trainer
- 2012 MarCom Honorable Mention in Design (Web)/Web Interactive Capabilities category for USCG Supervisor of Civilians Course

## PROGRAMS/PROJECT

- eLearning Indoctrination Course
- eLearning Sexual Harassment and Protection Course
- eLearning Maritime Law Enforcement Boarding Officer Course
- Blend Learning Supervisor of Civilian Curriculum
- FEA and eLearning Reserve Contingency Staffing Course
- FEA and eLearning RFRS & SERA Course
- FEA for Intelligence Specialty
- FEA for Reserve Program Administrator

## CAPABILITIES

- E-Learning
- Interactive Courseware (ICW)
- Online Training Management Systems
- Video Production
- Instructor-Led Training
- Simulator-Based Training

# HEALTH EXCHANGE TRAINING, MARKETING & OUTREACH

**C<sup>2</sup> HEALTH**, a division of C<sup>2</sup> Technologies, Inc., launches its Health Exchange Learning Portal (HELP) at [C2-Health.com](http://C2-Health.com), a complete suite of classroom, eLearning courses, and resources for nationwide education of Navigators/Consumer Assistors, Consumers, Brokers, Call Center Representatives (CSRs), Health Workers and Volunteers tasked with helping consumers enroll for healthcare coverage under the Affordable Care Act of 2010 (ACA).

# UAS - UNMANNED AERIAL SYSTEMS

## C<sup>2</sup> TECHNOLOGIES, INC.

**C<sup>2</sup> TECHNOLOGIES, INC.** is a full-service provider of Department of Defense, Homeland Security, Law Enforcement, and Emergency Management training services and products that meet the most demanding requirements of Federal, State, and Local Government agencies. C<sup>2</sup> brings innovation, integration, deployment, and lifecycle solutions to air, ground, and maritime unmanned systems operations and support.

### BCTM INFO

Unmanned Aerial System (UAS) training was conducted in two phases. Phase I consisted of asynchronous, interactive media instruction, integrating text, graphics, animations, simulations, knowledge checks, and mission-based scenarios. Soldiers were presented a problem scenario in a virtual environment at the beginning of the course then progressed through lessons providing instruction on the characteristics and capabilities of the system; the impact of mission variables; and how, when, and where to employ the UAS to support reconnaissance, target acquisition, and/or security missions. Upon completing the lessons, Soldiers were returned to the initial problem scenario to apply what they had learned.

### CAPABILITIES

- Web-based/Computer-based Training and Courseware
- UAS Operations Coordination and Information Dissemination
- Simulation and Virtual Learning Scenarios
- Evaluation and Assessment
- Multi-player collaborative immersive environment

During Phase II, Soldiers met in a multi-user online virtual exercise environment. This synchronous environment provided many forms of communication and capabilities, including live two-way video and nine channels of integrated audio similar to an Army radio net. Teams analyzed their FRAGOs, formulated their Course of Actions (COAs), created graphic 2-D map overlays utilizing the unit's symbols and control measures, and then executed the constructive simulation to determine results of their COA. C<sup>2</sup>'s observer-trainers reviewed the teams' plans and actions within the constructive simulation engine to provide Soldiers with an After Action Review (AAR).

Combining IMI training materials, observer-trainers, and a constructive simulation, C<sup>2</sup> is capable of delivering powerful UAS training that will help shape the future of training.

# TRAINING SYSTEM ACQUISITION & SUPPORT (TSA III) CONTRACT

ATSP offers world-class training and aviation support services. Our team of highly skilled and motivated employees provides a variety of support services, including aviation training and training support services, courseware and training product development, training device support, electronic hardware sustainment, professional engineering services, and aircraft modifications. You can count on ATSP for delivery of quality services and products with an unwavering focus on safety.

## Adequate ability to deliver/provide/conduct:

- Conduct front end analysis
- Provide operations, support, maintenance, and disposal
- Develop/provide & maintain software documentation
- Provide qualified personnel
- Integrate training technologies as appropriate
- Develop test/certification procedures
- Provide requirements tracking and traceability
- Develop/acquire, manage, track, and update source data
- Develop and integrate electronic signal environments
- Design/develop and document interactive media instruction
- Conduct operations in an IPT environment
- Provide appropriate government insight

## Adequate processes for developing, fielding, & supporting training systems:

- Systems Engineering
- Subcontract Management
- Program Management
- Test & Evaluation
- SW Design, Development, Test, Integration and Quality Control
- Hardware Design
- Fabrication
- Visual/sensor Database Generation/Integration
- HW/SW Integration
- Instructional Systems Development
- Change Control/management
- Concurrency Control
- Configuration Control/management
- Baseline Management
- Quality Control

# AM55 Aerial Lift Task Trainer

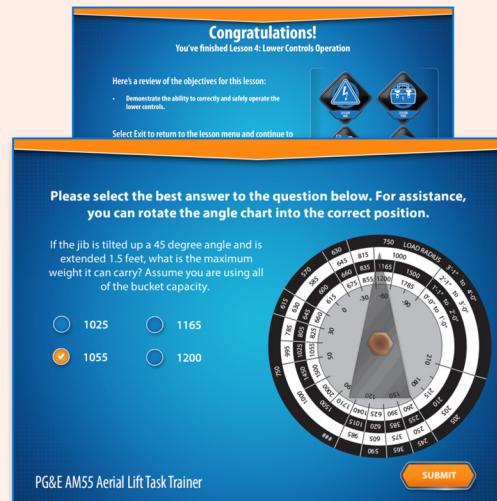

PG&E has created a mobile-based virtual task trainer for its AM55 aerial lift. This native iPad application provides training to lineman apprentices on the proper and safe use of this machinery.

Users learn safety information and OSHA regulation before ever touching the equipment.

The AM55 Virtual Task Trainer is a 3D training simulator available on the iPad. A mobile platform allows users to take this training anywhere, and at their convenience. The application provides an introduction to safety and setup processes. It explains each of the controls on the aerial lift before walking the student through the operation of the outriggers, lower controls, upper controls, and the material handler (winch).

Please select the best answer to the question below. For assistance, you can rotate the angle chart into the correct position.

If the jib is tilted up a 45 degree angle and is extended 1.5 feet, what is the maximum weight it can carry? Assume you are using all of the bucket capacity.

- 1025
- 1165
- 1055
- 1200

Select Exit to return to the lesson menu and continue to

Interactive knowledge checks and in-app rewards enhance learner engagement.

Using the Unity game engine, C<sup>2</sup> Technologies, Inc. has built a 3D replica of an AM55 aerial lift and a simulated training yard modeled after PG&E facilities. This means that students are actually learning on a virtual version of the same truck they will operate on the job.

Learn to operate all aspects of the AM55E: In-cab controls, outriggers, lower controls, upper controls, and material handler!
